

Nila Erturk

Full-Stack Web Developer

Personal Website | nilaerturk@gmail.com | 604-655-4663 | <https://www.linkedin.com/in/nila-e-956246290/>

Introduction

I am a motivated full-stack developer with hands-on experience building web and mobile applications using JavaScript, TypeScript, React, React Native, and Supabase, among other technologies.

I have collaborated on cross-disciplinary projects that leverage AI, responsive design, and scalable backend solutions, including applications supporting underrepresented tradespeople and collaborative student note-sharing platforms.

My background also includes teaching tech skills to youth, lab experience in clinical diagnostics and data analysis with R. I bring a strong combination of technical proficiency, problem-solving, and collaboration, and I am passionate about creating impactful digital solutions that combine usability, accessibility, and real-world relevance.

Skills

Languages: JavaScript, TypeScript, HTML, CSS, PHP, C#, R

Tech: React, Next.js, React Native, Expo, .NET, Node.js, Express.js, Hono, Clerk, Prism, Bun, Supabase, MongoDB, MySQL, PostgreSQL, Tailwind CSS, Sass, EJS, Axios

Tools: Figma, GitHub / Git, Jira, Windows OS, Vercel, Render, VSCode

Methodologies: Agile, DevOps, CI/CD

Product & Business: E-commerce, Marketing, SEO

Projects

Full-Stack Web Developer

[Joey](#)

September 2025– December 2025

- Worked in cross-disciplinary student teams to build an AI-driven application aimed at supporting underrepresented tradespeople in Canada by connecting them with nearby clients.
- Developed the frontend with Expo and React Native, implementing Tailwind CSS for styling and React Native Reusables for scalable, reusable UI components.
- Utilized Supabase for database management, authentication, and backend services, including Edge Functions to securely handle database operations.
- Presented the project at the BCIT FSWD × D3 Student Design and Technology Showcase, delivering a live seminar presentation to an audience of students, faculty, and industry guests.

Full-Stack Web Developer

[InkLink](#)

May 2025 – June 2025

- Collaborated with BCIT D3 (Digital Design & Development) students to implement a provided design over a one-month development cycle for a collaborative writing and note-sharing application for students.
- Implemented the frontend using React, TypeScript, and Mantine component libraries, translating professional designs into a user-centered interface.

- Implemented core application functionality aligned with project requirements and timelines.

Experience

Lead-In-Training

Byte Camp

July 2025 – September 2025

- Taught children a variety of tech and creative skills, including Blender (3D modeling), Scratch (programming), Claymation, music production, video editing, and beginner Python.
- Guided students through hands-on projects that encouraged creativity, problem-solving, and collaboration.
- Balanced digital learning with outdoor activities to create an engaging and well-rounded summer camp experience.

Laboratory Assistant

RepeatDx

December 2023 – March 2024

- Handled patient blood samples with precision, supporting telomere length testing for clinical diagnostics.
- Recorded and maintained patient data in the laboratory database with strict attention to detail.
- Organized and prioritized tasks to maintain efficient workflow in a clinical lab setting.

Summer Internship

Birol Lab at BCCDC

May 2022 – September 2022

- Conducted Antimicrobial Susceptibility Testing (AST) of peptides against various bacteria.
- Developed R scripts for data visualization and analysis of antimicrobial testing results.
- Conducted analysis on experimental results using R programming.

Education

Full-Stack Web Development diploma

British Columbia Institute of Technology

September 2024 – May 2026

Bachelor of Science

University of Toronto

September 2019 – May 2023

Cell & Systems Biology major, Immunology minor, Sociology minor

Additional Training & Certifications

CPR – Certified June 2025, Life Preservers

WHMIS – Workplace Hazardous Materials Information System, completed December 2023 at RepeatDx
